WHOLESALE PRICE LIST

for

1938-1939

TERMS OF SALE

TERMS OF PAYMENT—Prices listed here are based on cash payment; cash with order for immediate shipment. Booking orders will be accepted when accompanied by remittance covering 25% of purchase amount; the balance to be payable at time shipments demanded. Shipment may be made C. O. D. for balance when one-fourth of the amount of purchase is paid with the order.

PARCEL POST SHIPMENT—Be sure to include an amount sufficient to cover the postage; otherwise the shipment may be sent by express, regardless of the shipping instructions. B. & B. stock is not subject to parcel post.

PACKING CHARGES—Are extra at cost for specimens (B & B stock); free of charge for Lining Out stock.

CARLOAD SHIPMENTS—Unusually attractive quotations will be offered on B. & B. stock for carload orders; special discount may be allowed also for B. & B. Stock delivered at our nursery grounds without boxing.

PRICES APPLIED—5 and 50 of the same variety and same size at 10 and 100 rates, respectively; rates on 1,000 on application. No order of lining out stock less than 5 in same variety and same size accepted. All quotations are for immediate acceptance, subject to prior sale.

GUARANTEE—We guarantee all stock sent out to be well grown, healthy, true to name and properly packed. Our liability under the foregoing guaranty is limited in amount to original price received. We shall not be subject to any liability should injury befall stock from freeze, fire or any other cause beyond our control.

TRANSPORTATION—State whether order is to be shipped by parcel post, express or freight. When no instructions are given, shipment will be made using our best judgment. Our responsibility ceases upon delivery to forwarding companies; claims for losses or damages must be made upon the latter.

PURCHASE AMOUNT—We do not solicit order for less than one dollar in amount.

CLAIMS—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made immediately after the receipt of goods.

REMARKS—Prices listed here are for 10 and 100 rates for Lining Out Stock and each for Specimens. Attractive low prices for larger quantities on application.

Lining out Stock is listed here in light face type.

(C) indicates "from cutting," (S) Seedling," and (G) Grafting. (T) indicates once transplanted, (TT) twice transplanted, etc. All Lining Out Stock is understood to be in bare roots unless otherwise indicated.

SPECIMEN STOCK—Listed in bold face type. B. & B. means balled and burlapped. For carload orders or for specimen orders delivered at the field, without boxing, or to your truck, special prices most attractive will be offered.

We have several thousand very large sized splendid specimens that are not listed here. We shall be glad to offer you unusual bargain prices upon your request.

Some varieties in some grades of Lining Out stock, of which we have only a very small quantity, are not listed. So write us regarding any plants not listed here.

NOTICE—The prices listed here may be increased to include any Federal or State taxes levied upon sales, and any increase in the cost of labor or materials through legislation by any Federal or State agencies.

C O N I F E R S

CRYPTOMERIA JAPONICA VAR YOSHINO

We are the only nursery offering this valuable variety. It grows into a real symmetrical pyramidal shape and very compact, with very fine foliage. This is a much better Cryptomeria than the ordinary variety. Though it thrives in any environment, it likes a heavy moist soil best.

	Each	10	100
6-8 inch, C T. -----	1.25	10.00	
8-12 inchh, C. TT. -----	1.50	12.00	

CUNNINGHAMIA LANCEOLATA (Chinese Fir)

8-12 inch, C. T. -----	1.00	8.00
12-18 inch, C. TT. -----	1.25	10.00

CUNNINGHAMIA LANCEOLATA GLAUCA
(Blue Chinese Fir)

Character and appearance are same as Lanceolata above, but the foliage is more dense and glaucous. This will, we have no doubt, take a most important position in the Southern landscape. Supply very limited.

	Each	10	100
6-8 inch, C. T. -----		1.50	12.00
8-12 inch, C. T. -----		1.75	15.00

JUNIPERUS CHINENSIS ALBO-VARIEGATA
(Variegated Dwarf Chinese Juniper)

	Each	10	100
2-4 inch, C. T. -----		1.00	8.00
4-6 inch, C. T. -----		1.25	10.00

JUNIPERUS CHINENSIS FEMINA

(J. Japonica Sylvestris)

Loosely pyramidal with uniquely spreading branches. Foliage somewhat feathery. Very hardy: thrives well in South as well as in North.

4-6 inch, C. T. -----		1.00	8.00
6-8 inch, C. T. -----		1.25	10.00
12-18 inch, field grown, B&B -----	.50	3.50	
2-3 feet, field grown, B&B -----	1.25		
3-4 feet, field grown, B&B -----	1.50		

JUNIPERUS CHINENSIS FITZERIANA

(Pfitzer Juniper)

One of the best low growing junipers. Very popular all over the country.

4-6 inch, C. T. -----		1.00	8.00
6-8 inch, C. T. -----		1.25	10.00
12-18 inch spread, field grown, B&B -----	.75	6.00	
18-24 inch spread, field grown, B&B -----	1.00	8.50	
2-3 foot spread, field grown, B&B -----	1.50	12.50	

JUNIPER CHINENSIS PROCUMBENS

(Trailing Juniper)

Best known of the prostrate creeping juniper. Dense mat of blue-green foliage. Extremely hardy.

4-6 inch, C. T. -----		1.00	8.00
6-8 inch, C. T. -----		1.25	10.00

JUNIPERUS COMMUNIS (English Juniper)

Being propagated by cuttings from best shaped trees of choicest specimens, ours are uniform, broad symmetrical pyramidal shape.

4-6 inch, C. T. -----		.75	6.00
6-8 inch, C. T. -----		1.00	8.00
8-12 inch, C. T. -----		1.25	10.00

JUNIPERUS COMMUNIS ASHFORDI

Similar to the last, but columnar in habit. Compact and narrow growth.

4-6 inch, C. T. -----		.75	6.00
8-12 inch, C. T. -----		1.00	8.00
8-12 inch, C. T. -----		1.25	10.00

JUNIPERUS COMMUNIS COLUMNNALIS
(Columnar English Juniper)

4-6 inch, C. T. -----	1.00	8.00	
6-8 inch, C. T. -----	1.25	10.00	

JUNIPERUS COMMUNIS DEPRESSA
(Canadian Juniper)

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00

JUNIPERUS COMMUNIS DEPRESSA AUREA
(Golden Canadian Juniper)

4-6 inch, C. T. -----	.85	7.00
6-8 inch, C. T. -----	1.00	9.00

JUNIPERUS CONFERTA (Shore Juniper)

A low prostrate juniper with slender, spreading branches. Foliage willow-green in color. It thrives well on the seashore, particularly in sandy soil. However, it grows nicely in the interior also.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
12-18 inch, field grown, B&B -----	.50	

JUNIPERUS EXCELSA STRICTA

(Spiny Greek Juniper)

Well known dwarf variety in conical shape. Grows rather slow but is very hardy.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.20	8.00
12-18 inch, field grown, B&B -----	.50	
18-24 inch, field grown, B&B -----	.75	
2-3 feet, field grown, B&B -----	1.00	

JUNIPERUS HORIZONTALIS DOUGLASI

(Waukegan Juniper)

Splendid ground coverer, effective in rockeries with its long trailing steel blue foliage throughout the year.

4-6 inch, C. T. -----	.90	7.00
6-8 inch, C. T. -----	1.25	9.00
8-12 inch, C. T. -----	1.50	12.00

JUNIPERUS VIRGINIA GLAUCA

(Silver Juniper)

1 year, Grafted -----	.25	2.00
2-3 feet, field grown, B&B -----	1.50	
3-4 feet, field grown, B&B -----	2.00	

JUNIPERUS VIRGINIA CANNATI

One of the most beautiful Junipers. Its shape and habits are the same as Glauca, but the foliage is a very pleasant green.

1 year, Grafted -----	.25	2.00
2-3 feet, field grown, B&B -----	1.50	
3-4 feet, field grown, B&B -----	2.00	

LIBOCEDRUS DECURRENS

(Incense Cedar)

A beautiful conifer with shiny dark green foliage. Propagated from the best type trees among many hundreds.

4-6 inch, C. T., from 2½" pot -----	1.50	12.00
2-3 feet, field grown, B&B -----	1.25	
3-4 feet, field grown, B&B -----	1.75	

PODOCARPUS SINENSIS

(Japan Yew)

Dark green leaves with upright stems. Thrives well in sunny spots as well as in shady places. Rather slow grower, but stands much colder weather than the following variety.

PODOCARPUS SINENSIS MACROPHYLLA

(Large Leaved Japan Yew)

Leaves much larger and considerably faster grower. Very valuable plants for Florida and all Gulf Coast regions as well.

PRICES ON ABOVE TWO VARIETIES OF PODOCARPUS

	Each	10	100
4-6 inch, C. T. -----	.75	6.00

24-30 inchh, field grown, B&B -----	1.25		

THUJA ORIENTALIS AUREA GLOBOSA (Golden Ball Arbor Vitae)

Strictly dwarf with a perfect globe shape and bright golden foliage at all seasons. We originated this valuable variety years ago from a seedling of Conspicua. Very slow grower, but we assure you that it is the best Arborvitae for urn or pot culture.

2-4 inch, C. T. (spring delivery) -----	.75	6.00
4-6 inch, C. T. -----	1.00	8.00
6-8 inch, C. T. -----	1.25	10.00
8-12 inch, C. TT. -----	1.75	15.00

12-15 inch, field, good shape, B&B -----	.75	
15-18 inch, field grown -----	1.00	

THUJA ORIENTALIS COLUMNALIS STRICTA

Originated by us. Much narrower than Bakers and has a decidedly columnar growth with very compact branchlets. This is indeed an ideal plant, and for many years we have been looking for it to take the place of Italian Cypress, which does not thrive in some soils. Limited supply; book order early. (See picture.)

4-6 inch, C. T. -----	1.00	8.00
6-8 inch, C. T. -----	1.25	10.00

3-4 feet, field grown, B&B -----	1.00	

THUJA OCCIDENTALIS ELEGANTISSIMA

Most of the American Arborvitae (Occidentalis) fail to thrive in the South. But this variety is growing fine at our nursery. Very distinct from Orientalis, with longer leaves. Green with golden tips.

4-6 inch, C. T. -----	.90	7.00
6-8 inch, C. T. -----	1.10	9.00

HOWARD'S ARBORVITAE

The following arborvitae were originated by Howard's Montopolis Nursery:

BLUE CONE ARBORVITAE

Symmetrical and pyramidal shape with dense foliage of bluish tone. A very compact grower.

BLUESPIRE ARBORVITAE

Columnal shape with pleasant bluish foliage. This somewhat resembles Texarkana Glauca arborvitae, but is much more compact.

GREEN GLOBE ARBORVITAE

Resembles Bonita arborvitae with very compact growth —globe shaped with rich green foliage.

HOWARD'S IMPROVED HYBRID

Improved from Ramsey Hybrid. Character and habits of this variety are similar to Ramsey Hybrid, but its compact dense growth surpasses that of its parental stock.

PRICE ON ABOVE FOUR VARIETIES

3-4 feet, field grown, 3 times sheared, B&B -----	.75	6.00	

ARDISIA CRENUULATA

A dwarf evergreen plant with large, dark shiny green foliage and bright red berries in winter. It is used in large quantities by florists for Christmas pot plants. In the South, it is excellent for rock gardens or borders in specially shady locations. It commands great admiration from those visiting the famous Bellingrath Gardens.

2½ inch pot -----	1.25	10.00
-------------------	------	-------

AUCUBA JAPONICA VARIEGATA

A small evergreen shrub with large dark shiny green leaves dotted with yellow. This is one of the best plants for a shady place.

2½ inch pot -----	1.00	8.00
-------------------	------	------

A Z A L E A S

For the past several years the City of Mobile has been known to the world as the "Azalea City." Besides the Azaleas planted many years ago, annual plantings in public places and at private homes total many thousand bushes. We dare say that there is no floral display equal to that of Mobile in the spring when the Azaleas are in full bloom. No wonder so many visitors pour into this Gulf City from every direction during the blooming season, March to May, simply to see these beautiful flowers. Azaleas, contrary to general belief, or rather guess, are by no means hard to grow, provided a certain requirement is fulfilled. We are strong in the belief that the Azalea Indica can be raised without any trouble in all Gulf Coast regions and the Atlantic Coast as far north as North Carolina; and hardy Japanese Azaleas will grow as far north as the state of New Jersey. We earnestly recommend this flowering bush to fellow nurserymen as well as florists in these territories. Try them out as we did several years ago.

The following are a few cultural suggestions:

1. Azaleas thrive in acid soil. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case the Azaleas are to be planted in such a soil, remove original soil and use plenty of leaf mold or peat moss mixed with the other soil, containing no alkali; or if alkaline, apply Aluminum Sulphate at the rate of one 4-inch pot full to a wheelbarrow of soil.

3. As the azalea root system is very shallow, it dries fast. Apply sufficient water to keep roots moist always.

4. Azalea delights in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be made where all surplus water will run off quickly.

Azaleas thrive best in partial shade (when the bush grows larger, it will stand the full sunlight) but many good blossoms cannot be expected if the bushes are planted under complete shade.

6. The Azalea is not a gross feeder. If plenty of leaf mold or like organic matter is applied, it does not require any commercial fertilizer. On the contrary, very often a heavy application of fertilizer injures the root system. However, if necessary, a light application of well rotted cow manure, sheep manure or commercial fertilizers such as Vigoro is beneficial.

7. Red spider and Thirps sometimes trouble the plants. Frequent spraying of the plants with plain water will usually keep this trouble away. If this does not work, spray or dust the plant with a sulphur mixture.

New Azaleas

Several years ago, with special permission of the U. S. Government, we imported from Japan many rare varieties of Azaleas. Ever since, we have continued our tireless efforts to develop these varieties. Our devotion of time and utmost care has rewarded us with the pleasure we now have in introducing some of these rare plants to our customers this season. The supply is very limited. Book your order without delay.

MURASAKI-BOTAN (Purple Peony)

Belongs to the Ledifolia family. Flowers are made up of 15 to 20 long but narrow petals of light purple color, 2 to 3 inches in diameter. In appearance they very much resemble asters, despite the fact that they are Azalea blossoms. It blooms in March. Leaves are narrow and yellowish dull green with hairy segments. Fast grower and very hardy.

SAKURAGATA

One of Macrantha hybrid (Satsuki). Flower is single, 2 to 2½ inches in diameter. Dark crimson, with large patch of white in throat, very beautiful. Leaves medium to small; shiny dark green. This macrantha and its hybrid could stand very much cold weather. Starting in April, its blooming season is closed in June, retaining the after-glory of Indica and Kurume Azaleas all over. Ideal pot plant for late Easter and Mother's Day.

IZAYOI

Macrantha hybrid. Flower single, 3 inches in diameter with very pleasant pink flesh color.

SEI-QUA

Macrantha hybrid. Flower single, 2 to 2½ inches in diameter. Color white, ground margined beautifully with salmon pink. Very compact grower.

WAKAMATSU

Macrantha hybrid. Flower, hose-in-hose, 2½ to 3 inches in diameter. Very delicate purple in color.

BENI-KIRIN

Macrantha hybrid. Flower very double, consisting of 15 to 20 petals. 1½ to 2 inches in diameter. Brilliant blood-red with darker veins.

PRIDE OF PEACE (Showa-no-Homare)

Cross-hybrid of Azalea Macrantha and A. Ledifolia. Semi-dwarf, medium sized flower of a crimson color, with large patch of white in the throat—very beautiful. Blooms two weeks earlier than Macrantha Azaleas.

SEI-KAI

Macrantha hybrid. Flower hose-in-hose, 2 inches in diameter, pure white in color. Leaves small, roundish, dark, glossy green. This variety is most compact dwarf grower.

Left to right: Azalea Hinodegiri, 6-8 inch; Azalea Indica, 8-10 inch; Azalea flame, 8-10 inch.

AZALEA INDICA

*The supply is limited on items marked with an asterisk PINK AND ROSE RED FLOWERS

BRILLIANT—Bright water-melon red, flower medium mid-season, small leaves, compact growth.

CROEMINA—Shell pink, large flower, earliest bloomer and very rapid grower, but not compact.

GEORGE FRANC—Flame pink with deep carmine spot near the throat, large flower, early.

HARRY VEITCHII—Beautiful pink, large flower with waved petals. Mid to late season. Rather slow grower.

***MAXWELL**—Carmine red, mid-season, very hardy.

PERFECTION—Rose pink, large flower, mid-season.

***PRAESTANTISSIMA**—Carmine red, blooms a week earlier than Pride of Dorking.

PRIDE OF MOBILE—Lovely watermelon pink. Flower very large, mid-season. Large leaves, very vigorous grower. One of the best Indica Azaleas.

PRIDE OF DORKING—Beautiful cerise or carmine, late compact grower.

ORANGE RED

***COCCINEA MAJOR**—Brilliant scarlet, early season small leaves.

***GLORY OF SUNNINGHILL**—Large orange scarlet flower, late, compact grower.

MOSS POINT RED—Orange-red with purple spot at the throat. Mid to late season.

PRESIDENT CLAY—Orange-red with purple spot at the throat. Blooms early.

PRINCE OF ORANGE—Flower large, dark orange red. One of the richest colors of all azaleas blooming as late. Leaves medium, dark shiny green. Rather low headed with compact growth.

SALMON

DAPHNE SALMON—Medium flower with light salmon, early.

DUC DE ROHAN—Medium sized flower of lovely salmon Pink, blooms early, leaves small, shiny green, compact.

DUKE OF WELLINGTON—Soft salmon, with darker center, mid-season.

MOSS POINT LATE SALMON—Pretty salmon color, very large flower with widely waved petals. Very late, hardy, vigorous grower.

WILLIAM BULL—Double flower of mud red color, late, exceedingly vigorous and upright grower.

LAVENDER-LILAC

FORMOSA—Large lavender flower, mid-season, large leaves; most vigorous grower.

GULF PRIDE

A sport of Indica Alba (Ledifolia Alba). Flower medium to large, straight petals of most charming light purple color, could never be seen in other varieties, with four or five large flowers clustered like Rhododendron. It blooms at mid-season. Leaves broad and thick, dull green covered with hairy secretion. Rather upright and open growth unless well pinched. Very hardy and stands against cold better than any other Indica variety.

***ORCHID LAVENDER**—Medium flower of light orchid lavender pink, very early, upright growth.

PHOENICIA—Lavender, pink, mid-season, low and compact.

ROSY PURPUREA—Wine-red color. Late blooming.

VIOLA

A sport of Indica Rosea (Ledifolia Rosea). Character of parent tree faithfully inherited, but the color of the flowers is an admirable mauve. Very hardy and vigorous grower.

WHITE

***FIELDERS WHITE**—Early, large pure white flower. Strong upright grower.

FLAG OF TRUCE—Mid-season, full double with waved petals.

***INDICA ALBA**—(Ledifolia Alba) Snow white large flower, early to middle season, very hardy.

LATERETIA ALBA—Medium size, pure white flower, late, small leaves, very compact growth.

VARIEGATED

CRITERION—White ground well marked with wide pink stripes, late compact.

INDICA ROSEA—(Ledifolia Rosea) Extra large flower of white with rose throat. Mid-season, upright.

EVERYANA—White ground marked with narrow, faint pink stripes, late compact.

LADY EDITH—Variegated just like Criterion, but the flower is slightly smaller and the pink color is softer. Mid-season, compact.

***VITATA FORTUNEI**—White ground well striped with lavender pink. Very early, upright, open grower.

AZALEA INDICA, BELGIAN VARIETY

ALBERT ELIZABETH—Large double flower, ivory-white with frilled deep pink edge. Leaves medium to large, waxy dark green. Mid-season.

BLUSHING BRIDE—Very beautiful large double flower, light pink in color. Leaves large and glossy. Middle to late season.

COUNT DE KERCKHOV—Large, fringed double flower and variegated rose-pink in color, with white edge. Leaves large and glossy. Middle to late season.

ECLAIREUR—Deep crimson darker than Triumphe. Full double; leaves, medium dark green. Middle season.

MME. PETRICK SUPERBA—Semi-double large flower light lavender in color with white edge. Leaves shiny green, narrow and small. Very early bloomer.

NIOBE—Large double flower greenish white in color. Leaves large, roundish and thick. Blooms late in season. This is one of the popular varieties for the Easter trade.

PAUL SCHUME—Large double or semi-double flower, color of beautiful salmon red. Early bloomer.

TRIUMPHE—One of the best varieties. Large double flower of dark crimson color. Leaves large and dark glossy green. Very vigorous grower. mid-season.

VERVAENEANA—Large double flower with salmon rose with lighter border. Leaves large and glossy green. Blooms early and vigorous grower. Most popular variety.

VERVAENEANA ALBA—Best white variety. Flower large and full double white in color. Leaves large and shiny green. Blooms middle season.

We can supply only the following sizes:

GROUP "B"

AMOENA—Very popular variety. Flower rose purple.

APPLE BLOSSOM—White shaded pink with light center. Leaves are a very glossy green.

BRIDE MAID—Bright salmon red flower in large trusses. Mid-season, low, compact.

CHRISTMAS CHEER—Pleasant Christmas red, flower rather small, hose-in-hose. Heavy bloomer, early compact.

CORAL BELL—A pleasing coral pink color shading deeper toward center. The flower is very dainty and is produced profusely. Hose-in-hose type. Low, compact growing.

***DAY BREAK**—Light pink flower in dense clusters, mid-season.

HEXE—(Firefly)—A Kurume hybrid of low dense compact habit. Flower large in size for this group. Pleasing crimson red. Semi-double, mid-season.

HINODEGIRI—Most popular Japanese variety. Medium size single flowers of bright scarlet color. Leaves roundish, glossy green, very dwarf compact grower.

KIMUNAZOI—One of the Macrantha family. Single orange red flower with extremely narrow petals. It blooms very late (in June). Leaves very narrow. Low, compact, dense grower.

MACRANTHA—Single flowering. Large flower of clear pink, very late, low headed, compact.

MACRANTHA—Double—Double flower of large size with clear pink. Very late, also a few blossoms open through the summer. Compact, but rather upright.

MACROSTEMON—Another of the Macrantha family. Large salmon pink flower in May.

***MAUVE BEAUTY**—Beautiful shade of mauve, medium size flower, very dainty.

ORANGE BEAUTY—Good size flower of orange red color. Mid-season, compact.

PEACH BLOW—Single, pale shade of peach blossom pink. Mid-season, very fine.

PINK PEARL—Most noble cherry rose color shading lighter to center. Hose-in-hose type. Mid-season, compact, but upright.

***SALMON QUEEN**—A fine shade of salmon pink. Mid-season, hose-in-hose.

SNOW—Pure white flower, blooms profusely in clusters. Hose-in-hose. Mid-season, low, compact, one of best white variety.

***SWEET BRIAR**—One of Dreer's introductions. It is said that this is one of the hardiest in its group. Flower elegant rose pink.

YAEGIRI—Salmon red, hose-in-hose, mid-to-late-season compact.

CAMELLIA JAPONICA

Commonly known as "Japonica" in the South: becoming recently a most popular plant not only in the Gulf Coast Region, but all over the country. Its glossy green foliage all the year around together with most attractive and beautiful flowers in winter when no other flowers are found in the garden has been increasing the admirers of this plant. Millions of them are set out every year in open grounds or in conservatories and green houses as pot plants. It will regain, without any doubt, a popularity stronger than it had half a century ago, even as a cut flower.

BRIEF CULTURAL HINTS

SOIL PREFERRED—Camellia grows in almost any soil but well drained, good garden soil, a little acid in reaction is more suitable.

LOCATION DESIRABLE—Half shady location is preferable, especially when the plants are young; free blooming cannot be expected in a place entirely shaded.

ROOT SYSTEM, TRANSPLANTING—The root system of the Camellia is rather coarse and not quite so easily transplanted as the Azalea. For this reason, we recommend strongly potted plants especially for lining out, as setback would be reduced to a minimum. Moreover, a pot plant can be removed almost any time of year, while the plant from open ground has to be moved in winter or some time when it is in the dormant stage.

FERTILIZATION EFFECTIVE—The Camellia is a gross feeder; it responds well to fertilization. At the time of planting, if the soil is not fertile enough, use a mixture of one-half of garden soil, one fourth of well rotted cow manure and one-fourth of peat or leaf mold. Every winter or early spring apply well rotted cow manure; bone meal, or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotten leaves or peat is also beneficial.

PROPER WATERING—The Camellia loves a humid atmosphere. Do not neglect the watering. Frequent spraying on the leaves helps a great deal, especially at hot, dry summer months.

PRUNING RIGHT—Proper pruning is also essential. Prune with care such as water shoots, dead or injured

branches and branches growing too close together. General pruning should be done in the month of February, otherwise it may have an effect on the flower buds.

SPRAYING ADVISABLE—Red spider and various scales may attack Camellias. We have been using "Volck, Jr." at the ratio of 1 to 40 in the summer and 1 to 25 in winter, mixing one teaspoonful of Black Leaf 40 to every gallon of solution. Thorough spraying twice a year controls these pests satisfactorily. The strong sun has to be avoided immediately after the spray, as it may cause the leaves to burn.

We have a very much finer Camellia stock this season than heretofore, as it has made an extra vigorous growth during the summer. Our supply of some varieties, however, is limited, for numerous large orders have already been booked before the issuance of this catalogue. We suggest that you book your orders at the earliest possible date, otherwise we may not be able to meet your valued demand in the exact varieties and in the exact grades that you desire.

Plants offered here are all pot-grown, with the exception of large specimens. It is our strong belief that pot grown Japonicas are far superior to the plants taken from the ground. Plants from the pot can also be safely removed at any time of year. Our Camellia stock this year is listed in four Groups, prices of each group being different. Rareness of varieties of the kind are of course the main reason for higher prices.

GROUP ONE "A"

GIRARD DE BAILLON—We believe this is the most charming Camellia now in existence. The flower is not very large—3 to 3½ inches in diameter with 12 to 15 guard petals and 40 to 50 small petals intermixed with a number of yellow stamens very attractively formed. The color—white with dark crimson red, marking each other—gives a most charming appearance. It blooms from January to March. (See illustration of this flower in "Country Life," March, 1934.)

LADY HUME'S BLUSH—This is a very rare Camellia and one of the varieties most difficult to propagate. Medium flower, very full double, with delicate flesh pink. Leaves medium to large, thick, light color, large vein, distinctive. We have this year only small sizes to offer.

LEWIS' RED PEONY—Real name is not fully identified as yet. We temporarily call it, therefore, with the above name. Flower double or semi-double, peony type, 4 inches or larger. Color, from brilliant red turning deep crimson with velvety tone. Blooms January to March. Very profuse and free bloomer.

PRICE ON GROUP ONE "A"

	Each	10
3-5 inch, C. T., 2½" pot -----	.75	5.00
5-8 inch, C. T., 2½" pot -----	1.00	7.50

(Supply of this group limited to small quantity)

GROUP ONE "B"

ALBA PLENO—One of the best and most widely known white Japonicas, full double, large pure white, early bloomer. Leaves narrow and pointed, being somewhat crinkled.

AUGUSTA WILSON—We take great pleasure in naming this valuable variety "Augusta Wilson" in memory of a famous writer of Mobile. She loved this variety and planted it at her beautiful Ashland Place home many years ago.

Flower is double, peony type, $3\frac{1}{2}$ to 4 inches in diameter, with 15 large guard petals and 220 to 240 small petals mixed with a few yellow stamens divided into four or five compartments by 10 to 12 medium sized petals. The color is soft pink. Some of the flowers are marked with faint white spots. It blooms before Christmas. The leaves are large, roundish and thick.

CHANDLERII ELEGANS — Semi-double to double. Flowers very large, sometimes its measure reaches seven inches across. Pink variegated with white, somewhat of a peony form mixed with yellow stamens. Leaves medium to large, thick, pointed and somewhat curled. Dark glossy green. Rather slow grower, but blooms freely at an early age.

COUNTESS OF ORKNEY—Very double, pink stripes on white ground. Leaves medium, pointed, shiny green. Very slow grower but it blooms very young. Best variety for pot culture.

EMPEROR—Large semi-double to double flower with a few yellow stamens. Color is most pleasant brilliant red. Leaves are roundish, thick texture and very dark shiny green. One of best red varieties.

GOVERNOR MOUTON—One of the very popular varieties in Louisiana. Flower medium to large, with color of most pleasant oriental red marked with white spots. Somewhat of peony form, many small petals mixed with yellow stamens, middle season, free bloomer. Leaves light green and not so thick.

HERME—Semi-double, very large flower, variegated pink and white, generally white margin in the petals. Leaves rather small and pointed.

LADY VANSITTI VARIEGATA—One of the most beautiful variegated Camellias. Semi-double, rose type, $3\frac{1}{2}$ to 4 inches in diameter. Flower is composed of 19 petals and 80-90 yellow stamens. Color, white striped with shades of red. It blooms at middle season. The leaves are small and narrow and very crinkled—extra dark shiny green.

PINK PERFECTION—Medium sized flower, shell pink, very full double with immense small petals symmetrically arranged. Very early and free bloomer.

PROF. SARGENT—Full double, peony form, very tight in center. No yellow stamens mixed, color dark red. Leaves roundish, large, thick glossy green.

RUBRA VIRGINALIS—One of the outstanding varieties. The flower is $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter. Eight large guard petals and numerous incurved small petaloids form the flower. Peony shaped, it resembles Prof. Sargent, but is slightly looser. Late flowers in the season. occasionally semi-double with yellow stamens. Color is a very pleasing soft pink, but once in a while the guard petals have very narrow white stripes at the center. The leaves are very small. Early and a very free bloomer.

No. 47—Some call this the W'm. S. Hastie, but we are not quite sure as yet. The flower is 4 to 4½ inches in diameter, being overlapped symmetrically with 90 to 100 petals. Color bright red to deep vermillion red. Blooms mid-season, free bloomer.

TEUTONIA—Full double, 3½ to 4 inches in diameter, 75 to 80 petals, incurved tips overlapping each other symmetrically. This makes its appearance resemble some chrysanthemum flowers. The original tree produced various colors, such as very fleshy pink, white faintly striped with pink, and bright red. Leaves small and rather narrow, with thick and coarse texture. Very slow, but compact grower. Blooms mid-season.

18-24 inch, field grown, B&B -----	2.00		

GROUP TWO

ABBY WILDER—Pink, very double, peony form. Generally pink in color, but sometimes marked with white. (Abby Wilder is generally pink and white variegated. This strain must be propagated from pink branches.)

ANNA FROST—Semi-double to double, peony type. 3½ to 4 inches in diameter. 15 to 17 guard petals, 20 to 40 medium sized petals divided into 3 or 4 compartments holding a few yellow stamens each. Color is a beautiful blood red. Blooms January to March. Very free bloomer. Leaves medium to large, roundish, extra thick, very dark shiny green.

ELATA—(By Langdon) Semi-double very large flower 4 inches in diameter. Semi-peony type with yellow stamens. Color deep rose to carmine, bloom mid-season. Very free bloomer.

LADINER'S RED—As the name is not yet confirmed, this name is used here temporarily. Flower is very large and very double. Numerous narrow and small petals overlapped in numbers, very symmetrical. Color bright red to dark red. Leaves long and narrow, pointed not sharply, smooth and light green. One of the best red Camellias.

LADY SAUMEREZ—Flower very large, semi-double. Pleasant cherry red with white marking. Early and very free bloomer. Leaves rather narrow and sharply pointed with shiny glossy green.

LADY VANSITTI—Semi-double, large flower with most desirable shade of red. Very free bloomer at middle season. Leaves very narrow pointed and curled, dark glossy green.

✓ **OPELOUSAS PEONY**—Peony form, large flower with light pink and red veins, which makes it very beautiful. Occasionally spotted with white. Leaves very small.

OTOME—Very much like Pink Perfection, but the flower is slightly larger, and so are the petals. Leaves dark green in color.

No. 60—Possibly this is "Marie Louise." Flower double 2 to 3½ inches in diameter, peony shape with 15 to 20 guard petals and over 100 small petaloids. Color is bright crimson red with white marking. Resembles Chandlerii Elegans somewhat, but is a smaller flower with fuller double. Very free bloomer from January to March.

PURITY—Pure white, double but rather open center, large flower. Leaves medium to large, coarse appearance, rather dull green, free bloomer and hardy.

PRICE ON GROUP TWO

	Each	10	100

CAMELLIA JAPONICA

Left to right: 4 inch pot, 12-18 inch; 3 inch pot, 8-12 inch; 2½ pot, 6-8 inch; 2¼ inch pot, 3-5 inch.

GROUP THREE

BROOKLYANA—Very double, medium flower, deep pink mottled with white, blooms early season. Leaves large and thick, light green, smooth, very vigorous grower.

CANDIDISSIMA—Medium flower, pure white, overlapping each other symmetrically forming star shape. Leaves very small. Late bloomer.

CHEERFULNESS—Flower medium sizes of deep pink. Full double when the flower is fully opened. Sometimes little yellow stamens can be seen. Very early season and free bloomer. Leaves small roundish thick dark waxy, shiny green.

DARSLII—Medium flower, semi-double to double with yellow stamens. When fully opened, it is a most admirable bright red. Early and free bloomer. Leaves medium and roundish, dark glossy green.

DIXIE—Very hardy variety. Flower medium to small, but very double. Rose pink in color. Blooms earlier than Sarah Frost.

No. 27—Mrs. Hofein's Variegata. (We temporarily call it so.) Flower semi-double, 4 inches in diameter, somewhat peony shaped, with yellow stamens. Color white ground marked with pink stripes. Sometimes solid soft pink flowers on same branches. Blooms January to March; very free bloomer.

MARGUERITE GOUILLOON—(Duke de Orleans)—Peony form, large flower with creamy white ground flaked and dotted with rosy pink. Leaves roundish, broad, light green.

MATHOTIANA ALBA—Flower very large in shape, like a cup on a saucer Pure white, but seldom striped with slight pink. Leaves very large, thick, broad and shiny. Late bloomer.

NOBLISSIMA—Creamy white, petals interspersed with yellow stamens, very early and free bloomer.

JARVIS RED—Semi-double to double. Large flower of dark vermillion, petals large and crinkled, yellow stamens mixed. Leaves rather narrow and pointed and somewhat crinkled. Very free bloomer and vigorous grower.

ROSE EMRY—Peony form of medium size, dark crimson in color, blooming very freely in early season. Leaves medium to large, dark green but not so shiny.

SARAH FROST—Widely planted in Gulf Coast. Flower very double, crimson, very free bloomer at middle season. Very thrifty and easy grower.

TRICOLOR—Flower single to semi-double, large. White ground striped with pink and red. Very hardy, blooms very freely.

(Prices on larger sizes given on application)

CAMELLIA SASSANQUA

Despite the recent introduction to this country, Camellia Sassanqua has already become widely known and is gaining popularity among flower-lovers with wonderful speed. It blooms ahead of Japonica by months—generally from September to December. Size of blossom is about the same as Camellia Japonica, in different colors. Leaves are much smaller and the branches are slender, which appearance gives a softer tone to landscaping. It has also a great future as a pot plant.

CLEOPATRA—One of our introductions from Japan. The flower is semi-double, peony type, 3 inches in diameter with 12 to 15 petals and a few yellow stamens. Color is rose pink. The leaves are roundish in shape and dark shiny green. Very compact grower.

	Each	10	100
4-6 inch, C. T. -----		2.50	20.00
8-12 inch, C. TT. -----	.75	5.00	

BRILLIANCY—Color is same as Cleopatra—Bright cherry red—but the flower is large and single. The leaves are narrow and thick, dark shiny green. This is one of the most beautiful Sasanquas.

4-6 inch, C. T. -----	.20	1.75	15.00
8-12 inch, C. TT., heavily branched -----	.40	3.00	25.00
12-18 inch, C. TTT., heavily branched, B&B -----	.75	5.00	40.00
18-24 inch, C. TTT., very heavily branched, B&B -----	1.00	7.50	
2-3 feet, field grown, B&B -----	2.00	17.50	

DAWN (Akebono)—This is the hardiest Sasanqua of all, withstanding the severest freezes. When the buds of the other varieties are frozen its blooms stand perfectly. The flower is very large, double, ivory white with flesh pink at the margin of the petals and yellow stamens. The leaves are small, narrow, dark shiny green. Very compact, symmetrical pyramidal shape; slow grower.

4-6 inch, C. T. -----	2.00	15.00
6-8 inch, C. T. -----	2.50	20.00
8-12 inch, C. TT. -----	3.00	25.00

CRIMSON BRIDE—We secured this beautiful variety out of many thousands of seedlings. Flower single, a good size, crimson color with yellow stamens. Leaves medium; compact grower.

4-6 inch, C. T. -----	2.00	15.00
6-8 inch, C. TT. -----	2.50	20.00
8-12 inch, C. TT. -----	3.00	25.00

SNOW ON THE MOUNTAIN (Mineno-yuki)—Flower large, full double, peony form. Pure white in color. Leaves are small and roundish. Branch spreads out in habit. Blooms very freely at an early age.

4-6 inch, C. T. -----	1.00	8.00
6-8 inch, C. T. -----	1.20	10.00
8-12 inch, C. T. -----	1.50	12.00
12-18 inch, field grown, B&B -----	.75	
18-24 inch, field grown, B&B -----	1.00	
2-3 feet, field grown, B&B -----	1.50	
3-4 feet, field grown, B&B -----	2.50	

MAIDEN'S BLUSH—Flower single, delicate soft pink, very attractive. Leaves medium to large, compact grower.

WHITE BUTTERFLY—Flower single, white with delicate flesh pink margin. Leaves largest among this group. Very vigorous grower.

PRICE ON ABOVE TWO VARIETIES

4-6 inch, C. T. -----	.80	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. TT. -----	1.25	10.00

2-3 feet, field grown, B&B -----	1.25	
3-4 feet, field grown, B&B -----	2.00	

We can supply the last two sizes only in the WHITE BUTTERFLY variety.

CAMELLIA SASANQUA SEEDLINGS

Mostly single flowers. Colors, white, various pinks, and some red mixed. We offer this season very fine plants of compact columnal shape.

	Each	10	100
3-4 feet, field grown, B&B -----	1.50	12.50	
4-5 feet, field grown, B&B -----	2.00	17.50	

CAMELLIA THEA (Tea Plant)

Sweet-scented flower in late fall. A fine evergreen shrub. We have this year extra nice seedlings.

8-12 inch, S. -----	.50	4.00
12-18 inch, S. -----	.75	6.00
12-18 inch, field grown, B&B -----	.35	

CLEYERA JAPONICA

A splendid evergreen shrub with thick glossy leaves and creamy white fragrant flowers. Berries red in winter. An upright grower, reaching the height of 10 to 12 feet. Ours propagated from cuttings from best specimens, superior in every respect to those from seed.

4-6 inch, C. 2½" pot -----	1.00	8.00
18-24 inch, field grown, B&B -----	.75	

CINNAMOMUM CAMPHORA

(Camphor Tree)

6-8 inch, S. T. -----	.60	5.00
8-12 inch, S. T. -----	1.00	7.00
12-18 inch, C. T. -----	1.25	10.00

CLINOPODIUM COCCINEUM (Red Sage)

This is one of the most prospective native plants of south Alabama. It grows in the poorest sandy or rock soils. A slender, sparingly branched shrub of two or three feet in height with small evergreen leaves and horizontal tubular, bright red flower blooming all the summer and the fall until just before Christmas, especially at autumn, even young plants of a few inches are covered with a mass of red flowers. In addition to its attractive appearance, it has a pleasant odor which might possibly be utilized in perfumery. No cold spell ever injured this plant down here; it may stand near zero weather, probably lower. No doubt this is one of the most suitable plants for Southern rock gardens; also it will be very valuable as a pot plant. We offer this year potted plants, as we have found that collected plants are hard to transplant.

	Each	10	100
From 2¼" pot -----	1.00	8.00	

CONRADINA CANESCENS (Blue Sage)

A low, dense, compact shrub, with small narrow, beautiful silver colored evergreen leaves. The flower resembles Rosemary very much—pale bluish blossoms from early summer to late fall. It thrives on dry poor soil. It is indeed a suitable plant for the rock garden, also border planting as well as pot planting. We offer cutting grown and potted plants.

	Each	10	100
From 2½" pot -----	1.00	8.00	

COTONEASTER HARROVIANA

One of the good Cotoneasters, particularly on the Pacific Coast. Very highly praised. It resembles Franchetti very much but bears more berries, which are red.

COTONEASTER PANOSA

One of the Cotoneasters that thrives well in the Southern climate. Silvery leaves together with abundant red berries; most attractive.

PRICES ON ABOVE TWO VARIETIES

	Each	10	100
6-8 inch, C. T., 2½" pot -----	.90	7.00	
8-12 inch, C. T., 3" pot -----	1.25	9.00	
18-24 inch, field grown, B&B -----	.75		
2-3 feet, field grown, B&B -----	1.00		

DURANTA PLUMIERI (Golden Dewdrop)

Dark green foliage and racemes of light blue flowers, being followed by golden yellow berries makes this one of the most attractive shrubs in Southern gardens. It is rather tender, but it thrives well in the Gulf Coast country. Northern gardeners who are looking for a real novelty may try this Golden Dewdrop, planting out during summer and taking into greenhouse or cellar in the winter.

6-8 inch, C., 2½" pot -----	.75	6.00
12-18 inch, C., 3" pot -----	1.00	8.00

ELAEAGNUS PUNGENS FRUITLANDI

Leaves are very large and glossy green with silvery underside. It bears abundant edible fruit even when young.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. TT. -----	1.25	10.00

18-24 inch, field grown, B&B -----	.50	
2-3 feet, field grown, B&B -----	1.00	
3-4 feet, field grown, B&B -----	1.50	

ELAEAGNUS PUNGENS MACULATA (Yellow Center Elaeagnus)

ELAEAGNUS PUNGENS VARIEGATA (Yellow Edged Elaeagnus)

Both of them are variegated, but one has yellow center with dark green margin, while the other has a yellow edge and green center. The color is not changed by the sun nor cold. A most beautiful evergreen shrub among other dark green shrubs.

4-6 inch, C. T. -----	.90	7.00
6-8 inch, C. T. -----	1.10	9.00
12-18 inch, field grown, B&B -----	.50	

ELAEAGNUS PUNGENS REFLEXA

Branches in drooping and spreading character. Leaves scaly beneath with bronze color. Very useful landscape decoration.

4-6 inch, C. T. -----	.75	6.00
-----------------------	-----	------

EURYA JAPONICA

A fine shrub or small tree, grows to twenty feet in height. Leaves ovate or obovate, $1\frac{1}{2}$ inches by $2\frac{1}{2}$ to 3 inches in size, thick and dark glossy green, slightly serrate. Grows symmetrically pyramidal in shape with compact branches. This is supposed to be one of the cleanest bushes in Japan and is planted extensively in temple and shrine gardens. Foliage commercialized in considerable quantity as a green for floral works.

	Each	10	100
8-12 inch, C. TT -----	1.00	8.00	
12-18 inch, C. TT -----	1.25	10.00	
2-3 feet, field, B&B -----	.75		
3-4 feet, field, B&B -----	1.25		

EURYA EMARGINATA

Boxwood-like evergreen foliage and axillary paired flowers, followed by black berries. Most desirable for low hedges.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. T. -----	1.25	10.00

EUONYMUS AMERICANUS

2-3 feet, field grown, bushy, B&B -----	.75		

GARDENIA FORTUNEI (Everblooming)

Large dark shiny green foliage and large double white flowers, highly scented. Pride of this variety is that it blooms not only in the spring but has a few flowers in the summer and fall when Gardenia flowers are very scarce on the market.

GARDENIA HADLEY

Recently introduced to the market. Flower, Belmont type, very large and full double. It has won many gold medals at leading flower shows.

GARDENIA MYSTERY

Extra large leaves and flower. Grows out of doors in warm regions.

PRICES ON ABOVE THREE GARDENIAS

Strong rooted cutting -----	.50	4.00
From 2½" pot -----	1.25	9.00
From 3" pot -----	1.75	14.00

2-3 feet, field grown, bushy, B&B -----	1.00	

GARDENIA RADICANS (Creeping Cape Jasmine)

It grows not over a foot high but spreads 3 to 4 feet. Rather creeping character. Flower double white, very fragrant. Leaves small and shiny glossy green. It is an ideal plant for Southern rock gardens and borders. A very fine plant for florists for Mother's Day trade as well as for Memorial Day.

4-6 inch, from 2½" pot -----	.75	5.00
6-8 inch, from 3" pot -----	1.00	8.00

GARDENIA VIETCHII (Overlook Strain—5" Pot)

GARDENIA VIETCHII (Overlook Strain)

For many years we have been endeavoring to improve this strain for commercial use and we are now, we believe, nearing the goal. The flowers of this strain are not extra large, but of the right size for commercial purposes. The highest point of our pride in this strain is the production of more flowers than any other, especially when it is very young. Flower is full double, pure white, and will stay white for a long period. Leaves rather small but very dark glossy green in color. Very hardy, vigorous grower with long stems. Our crop this year is better than ever. We offer you healthy vigorous, well pinched plants with many buds at the following prices.

	Each	10	100
6-8 inch, from 2½" pot -----	1.25	9.00	
8-12 inch, from 3" pot -----	1.75	14.00	
12-15 inch, from 4" pot -----	2.50	20.00	
12-15 inch, from 5" pot -----	3.00	25.00	

Strong rooted cuttings:

per 100, \$4.00; per 1000, \$30.00.

GORDONIA LASIANTHUS
 (Summer Camellia or Loblolly Bay)

A fine native evergreen plant with large dark green shiny leaves. White flower, 2½ to 3 inches in diameter with a bunch of yellow stamens very much resembling a single Camellia are borne freely during June and July. This is one of the finest flowering evergreen shrubs for the Southern landscape.

	Each	10	100
4-6 inch, C. T. -----	.25	10.00	
6-8 inch, C. T. -----	1.50	12.00	
8-12 inch, C. T. -----	1.75	15.00	
18-24 inch, field, B&B -----	.75		

ILEX (Holly)

Holly of any variety in general is very difficult to transplant, therefore we offer you this year some varieties carefully grown in pots, as we know that the best results are to be obtained by this method.

I. CASSINE (Dahoon Holly)

A popular evergreen, native of northern Florida. Leaves have no spine, much resembles Ilex Integra, but not so shiny green as the others. Producer of bright red berries in abundance.

I. CASSINE ANGUSTIFOLIA

An evergreen with very narrow leaves. Produces red berries at an early age.

PRICE ON ABOVE TWO VARIETIES

	Each	10	100
4-6 inch, C. T. -----	.75	6.00	
6-8 inch, C. T. -----	1.00	8.00	
8-12 inch, C. TT. -----	1.25	10.00	
12-18 inch, C. TT. -----	1.50	12.00	
2-3 feet, field, B&B -----	1.00		
3-4 feet, field, B&B -----	1.50		

I. CASSINE MYRTIFOLIA

The leaves of this variety are much smaller and stiffer than Augustifolia. A handsome evergreen shrub with red berries.

6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. T. -----	1.25	10.00
12-15 inch, C. TT. -----	1.50	12.00

I. CORNUTA (Chinese Holly)

A very handsome holly with large spiny, dark glossy green leaves with large red berries.

8-12 inch, C., from 3" pot, 2 yrs. -----	1.50	12.00
18-24 inch, field, B&B -----	.75	
2-3 feet, field, B&B -----	1.25	
3-4 feet, field, B&B -----	1.75	

I. CORNUTA FEMINA

Appearance and character exactly like the former variety, except that it is sure to bear the berries. Our cuttings taken from bearing specimens.

	Each	10	100
4-6 inch, 2½" pot -----	1.00	8.00	
6-8 inch, C., 3" pot -----	1.50	12.00	

I. CORNUTA BURFORDII

A handsome form of I. Cornuta. Leaves are a beautiful shiny green with a little spine. Our plants are propagated from berry bearing trees.

4-6 inch, from 2¼" pot -----	1.25	10.00
6-8 inch, from 3" pot -----	1.50	12.00
8-12 inch, from 3" pot -----	1.75	15.00
12-15 inch, bushy, field, B&B -----	.75	
15-18 inch, bushy, field, B&B -----	1.00	
18-24 inch, bushy, field, B&B -----	1.25	
2-3 feet, field, B&B -----	1.75	
3-4 feet, field, B&B -----	2.50	

I. CRENATA (Japanese Dwarf Holly)

I. CRENATA ROTANDIFOLIA

Similar to former variety, but the leaves are much larger and quite roundish.

4-6 inch, C. T. -----	.75	6.00
12-15 inch spread, very bushy, field, B&B -----	.75	
15-18 inch spread, very bushy, field, B&B -----	1.00	

I. INTEGRA

A beautiful evergreen. Leaves oblong with tapering point, shiny dark green. White flowers in May and beautiful red berries in winter.

8-12 inch, C., 3" pot -----	1.25	10.00
12-18 inch, C., 3" pot -----	1.50	12.00
2-3 feet, field, B&B -----	1.50	

I. LATIFOLIA (Big Leaved Holly)

Hardy evergreen shrub. Leaves oval to oblong lanceolate, very thick, serrate, glossy green above, very large — sometimes reaches 7 inches long and 3 inches wide. Small flower in May and clusters of red berries in winter.

4-6 inch, C., 2½" pot -----	1.25	10.00
6-8 inch, C., 2½" pot -----	1.50	12.00

I. OLDHAMI

Tall growing evergreen tree, with attractive red berries.

4-6 inch, 2½" pot -----	1.00	8.00
-------------------------	------	------

I. OPACA FEMINA (Berried Kind)

Well known native evergreen, growing wild. However, this wild plant is hard to transplant successfully. Moreover, it bears no berries in many cases. Our propagation was done by cuttings secured from the best berry bearing specimens and are guaranteed to bear.

	Each	10	100
4-6 inch, C., from 2½" pot (spring delivery	.75	6.00	
6-8 inch, C., from 2½" pot -----	1.00	8.00	
8-12 inch, C., from 3" pot -----	1.50	12.00	
2-3 feet, field, B&B -----	1.00		
3-4 feet, field, B&B -----	1.50		

I. PEDUNCULOSA

A beautiful evergreen shrub with shiny and somewhat curled leaves. Red berries in fall.

6-8 inch, C., from 3" pot -----	1.25	10.00
---------------------------------	------	-------

I. VOMITORIA FEMINA (Berry Bearing Yaupon)

Ours propagated strictly by cuttings from heavily berried specimens.

4-6 inch, C., from 2¼" pot -----	.75	6.00
6-8 inch, C., from 3" pot -----	1.25	10.00
2-3 feet, field sheared, B&B -----	1.25	
3-4 feet, field sheared, B&B -----	2.00	

ILEX VOMITORIA NOBILIS

This strain was found a few years ago by Mr. Garee of the Noble Nursery, Noble, Okla. He picked up one tree in perfect condition among several thousand common Yaupons badly injured or killed by an unusually severe freeze which visited that locality one winter. Propagation with cuttings from this plant was carried successfully and no crop missed ever since. Compared with the other Yaupons the leaves of this strain are slightly thinner in texture and larger. It grows faster and more compactly in addition to its resisting power from freeze.

4-6 inch, C., from 2¼" pot -----	1.50	10.00
6-8 inch, C., from 3" pot -----	2.00	15.00
12-18 inch, field, B&B -----	.75	
2-3 feet, field, B&B -----	2.50	

ILLUCIUM ANISATUM

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00

JASMINUM FLORIDUM

Hariest evergreen jasmine, with very dark glossy foliage in graceful arching branches. Very attractive. Yellow flowers in cluster.

JASMINUM HUMILE (J. Revolutum)

A tall shrub, reaching 7 to 8 feet in upright growth. Yellow flowers in spring and fall. Hardy as far north as Washington, D. C.

PRICES ON ABOVE TWO VARIETIES

	Each	10	100

5-6 feet, field, 5 times sheared, columnal shape, B&B -----	4.00	

UNSHEARED LAUREL

4-5 feet, field, B&B -----	1.75
5-6 feet, field, B&B -----	2.50

LAUROCERASUS OFFICINALIS (English Laurel)

Medium to large spreading shrub with broad shiny rich green foliage. One of the most useful plants for Southern planting.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. T. -----	1.25	10.00
18-24 inch, field, B&B -----	.75	
2-3 feet, field, B&B -----	1.00	

LAURUS NOBILIS (European Sweet Bay)

This is the Bay commonly admired in Europe. It is not only ornamental in the garden, but is also decorative as a house plant setting in tub. As a spice the leaves are held in high esteem by house wives.

6-8 inch, C., from 2½" pot -----	1.00	7.00
----------------------------------	------	------

LIGUSTRUM CORIACEUM (Dwarf Privet)

Dwarf privet in peculiar shape with leathery, thick, dark leaves imported from Japan years ago and we have found that leaves of our strain are much thicker and more curled. We have this season only limited quantity in small sizes to offer.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, field, B&B -----	.50	
12-15 inch, field, B&B -----	.75	

LIGUSTRUM JAPONICUM

	Each	10	100
6-8 inch, S.	.50	3.00	
8-12 inch, S.	.75	5.00	
12-18 inch, S.	1.00	8.00	
2-3 feet, field, B&B	.50		

LIGUSTRUM JAPONICUM AUREAUM MARGINATUM (Golden Tip Japan Privet)

Much deeper yellow margin on young growth. Bears purple berries heavily in winter. Contrast with leaves in admirable colors.

LIGUSTRUM JAPONICUM EXCELSUM SUPERBUM

Best of all Japan Privets. Leaves variegated with creamy white. Contrast with other green foliages gives exceedingly good effects to general view of the garden. Supply limited. Order early.

PRICES ON ABOVE TWO VARIETIES

8-12 inch, TT.	1.00	8.00
12-15 inch, TT.	1.50	12.00

LIGUSTRUM LUCIDUM COMPACTUM (True Waxy Privet)

6-8 inch, C. T.	.75	6.00
8-12 inch, C. T.	1.00	8.00
18-24 inch, field, B&B	.40	
2-3 feet, field, B&B	.75	
3-4 feet, field, B&B	1.25	

LIGUSTRUM LUCIDUM GRACILIS (Shiny Pyramidalis)

A tall slender shrub with strong upright branches. Leaves pointed, thick, shiny and dark green. This variety is one of the darkest green leaved species of all Lucidums.

LIGUSTRUM LUCIDUM PYRAMIDALIS

Tall growing waxy privet. Very symmetrical pyramidal shape with shiny green foliage.

LIGUSTRUM REPANDA (Crinkled-leaf Privet)

Closely resembles Ligustrum Pyramidalis but leaves are narrow and crinkled.

PRICE ON ABOVE THREE VARIETIES

6-8 inch, C. T.	.75	6.00
8-12 inch, C. T.	1.00	8.00
18-24 inch, field, B&B	.40	

LIGUSTRUM CORDIFORMIS

It resembles Compactum, but the leaves are much larger, thicker and rounder. The color of the leaves is much darker than any other Lucidum.

4-6 inch, C. T.	.75	6.00
6-8 inch, C. T.	1.00	8.00

LIGUSTRUM HENRRI

Small Ligustrum bushes with extra dark glossy green foliage. Leaves are slightly larger than *L. Ionandum*, but much smaller than *Lucidum*. It makes the best sheared plants as well as fine hedge.

LIGUSTRUM IONANDUM

Recent introduction by an agricultural explorer. Leaves very small, like boxwood. On account of its dwarfness, most desirable for low hedges or border planting.

LIGUSTRUM QUIHOI

Resembles Amoor River Privet in the South, but leaves are thicker and more glossy. It blooms through the season.

PRICE ON ABOVE THREE VARIETIES

	Each	10	100
8-12 inch, C. T. -----	.75	6.00	
12-18 inch, C. T. -----	1.00	8.00	
18-24 inch, field, B&B -----	.50		
2-3 feet, field, B&B -----	.75		

MAGNOLIA FUSCATA (*Michelia Fuscata*)

Well known Southern shrub with handsome compact evergreen foliage and sweet carmine edged yellow flower, which has strong, banana-like fragrance. One of the very useful plants for Southern landscape gardening.

4-6 inch, from 2½" pot -----	1.00	8.00
6-8 inch, from 3" pot -----	1.25	10.00
8-12 inch, from 3" pot -----	1.50	12.00
12-18 inch, field, B&B -----	.75	

MAHONIA FORTUNEI

Low shrub, somewhat resembling Nandina. Leaves are long and narrow, serrated with small teeth. Long racemes erect at winter time with numerous bright yellow flowers.

6-8 inch, C., from 2½" pot -----	.90	7.00
8-10 inch, C., from 3" pot -----	1.25	10.00

MAHONIA JAPONICA BEALI

Broad holly-like leaves of very thick texture with spiny edges. Bell-shaped yellow flower usually in mid-winter, being followed by clusters of purple berries. This variety thrives well in the South where *Mahonia Aquifolium* fails to grow, being burnt. Does well under partial shade.

1-2 inch, S. -----	.50	3.00
8-12 inch, C. TT. -----	1.75	15.00

MYRTUS COMMUNIS MICROPHYLLA (Small Leaved Roman Myrtle)

With small leaves and compact growth. Very valuable plant for Southern gardens.

6-8 inch -----	1.00	8.00
8-12 inch -----	1.50	12.00

NANDINA DOMESTICA

	Each	10	100
4-6 inch, S. T. -----	.75	6.00	
6-8 inch, S. T. -----	.90	7.00	
8-12 inch, S. T. -----	1.25	10.00	
12-18 inch, field, B&B -----	.50		

OLEANDER

This is the hardiest variety of Oleander. We have had this particular variety a number of years and it has never frozen back. Flower single, large, bright pink.

6-8 inch, C. T. ----- 1.00 7.00

OSMANTHUS AQUIFOLIUM (O. Ilicifolium)

This is the hardiest of all the Osmanthus family. Thrives in New York and possibly as far north as Massachusetts. Leaves are leather-smooth and shiny. Strong spines on both sides of foliage, somewhat resembles *Ilex Cornuta* (Chinese Spiny Holly).

OSMANTHUS FORTUNEI

Similar to sweet olive, but leaves are thicker and armed with dull spine like American Holly. Less flower, but stands much severer cold spell than the other.

OSMANTHUS FRAGRANCE (Sweet Olive)

Well known shrub with bright glossy thick foliage and small white or yellow flowers sweetly scented. A few plants of this kind will fill the air of the entire garden with a delightful odor during winter and spring.

PRICE ON ABOVE THREE VARIETIES

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. TT. -----	1.20	10.00
12-18 inch, C. TTT. -----	1.75	15.00
18-24 inch, field, B&B -----	.75	
2-3 feet, field, B&B -----	1.00	
3-4 feet, field, B&B -----	1.50	

PASONIA EDULIS

A variety of Japanese evergreen oaks that grows up to thirty feet in height. Leaves are large, oblong to ovate, pointed, thick and smooth, shiny dark green. Acorn $\frac{3}{4}$ to 1 inch long, edible. Very vigorous grower. We observed several times that this tree stood unharmed when our live oaks were badly injured by freeze.

4-6 inch, C. ----- 1.00 8.00

PHOTINIA GLABRA

This beautiful shrub was introduced by us to this country. Whenever covered with new sprouts Photinia Glabra is a mass of burning scarlet, tinted here and there with old leaves of green. You will surely be convinced that this is one of the best trees ever introduced. There are several different strains; beware of the inferior kinds. It may be made in any shape you desire, such as pyramidal, standard or globe. Suitable for hedge, individual planting as well as mixed setting among green leaved evergreens.

4-6 inch, C. T. -----	.75	6.00
6-8 inch, C. T. -----	1.00	8.00
8-12 inch, C. TT. -----	1.25	10.00
18-24 inch, field, light, B&B -----	.50	

PHOTINIA SERRULATA

	Each	10	100
4-6 inch, C., from 2½" pot -----	.90	7.00	
18-24 inch, field, B&B -----	.75		

PIERIS JAPONICA (Japanese Andromeda)

Shiny, thickly-leaved evergreen. Grows 5 to 6 feet in height. Drooping cluster of small white flowers early in spring. Best in moist, partially shady place.

4-6 inch, C., from 2¼" pot -----	1.00	8.00
8-12 inch, lath house, B&B -----	.50	

PITTOSPORUM TOBIRA

4-6 inch, C. from 2½" pot -----	.75	6.00
6-8 inch, C., from 3" pot -----	1.00	8.00
12-18 inch spread, field, B&B -----	.75	
18-24 inch spread, field, B&B -----	1.00	
2-3 feet spread, field, B&B -----	1.50	
3-4 feet spread, field, B&B -----	2.50	

PITTOSPORUM TOBIRA VARIEGATA

4-6 inch, C., from 2¼" pot -----	1.00	8.00
----------------------------------	------	------

PYRACANTHA (Fire Thorn)

P. LALANDI

Most popular and hardiest variety, with golden yellow berries. Somewhat less thorny and the leaves are a softer texture.

P. YUNNANENSIS

Rather dwarf and spreading habit. Abundant berries of coral color, which are small.

P. FORMOSANA

Possibly this is the most showy variety of all Pyracanthas. A solid mass of brilliant red berries, in large glossy green foliage. Upright grower.

PRICES ON ABOVE PYRACANTHAS

4-6 inch, C. T. -----	.60	5.00
6-8 inch, C. T. -----	.75	6.00
8-12 inch, C. TT. -----	1.00	8.00

SERISSA FOETIDA

6-8 inch, C. T. -----	.75	5.00
8-12 inch, C. TT. -----	1.00	7.00

VIBURNUM MACROPHYLUM (Sweet Viburnum)

A valuable evergreen shrub with large green, oblong leaves which turn sometimes to beautiful red in winter. Small white flower being followed by red berries in cluster. Very hardy and grows in any kind of soil and location. Southern planters ought to use more of these Viburnum varieties for their landscape gardening.

VIBURNUM ODORATISSIMUM (Glossy Viburnum)

Leaves large, oblong with points, polished dark green in color. Its growth is very compact and a little harder than V. Macrophyllum. As it bears berries of coral color it has been known in Japan as coral berried Viburnum. This is one of the most promising broad leaved evergreens in the South.

DECIDUOUS TREES AND SHRUBS

ACER PALMATUM ATROPURPUREUM

Blood-leaf Japanese Maple; a favorite ornamental plant Among Northern and Eastern gardeners. It sprouts out with blood red leaves and maintains the color for a considerable period of time. Nearing autumn it turns dull green. When light frost touches, however, it turns red again. This wonderful coloring and fascinating habit gives a much softer touch to our Southern gardens, which are usually stiffened by too many evergreens in almost the same color.

12-15 inch, C. T. -----	.75	6.00

BUDDLEIA HARTWEGI

Newly introduced Buddleia. It is a harderier variety than any of summer flowering Buddleias. The large bright lavender panicles of flowers through the summer to fall are surely attractive. The foliage is very heavy and rich dark green. Buddleia Hartwegi is not only the best variety for cutflowers, but as an ornamental lawn shrub it is also unsurpassed in its beauty and usefulness.

FRANKLINIA (Gordonia Alatamaha)

This is a very rare native American flowering tree, having been found by John Bartram in 1790, but has been lost for many years and only recently reintroduced. A small tree to 30 feet. Leaves obovate-oblong, narrowed into a short petiole, slightly serrate, light green and shining above, turning scarlet in the fall. 5 to 6 inches long. Flower single, 3 inches in diameter, pure white with numerous yellow stamens. Blooms during August. Very vigorous grower and hardy in the South as well as in the far North.

HYDRANGEA (French Variety)

This variety blooms all summer long. Flower extra large, color deep blue in an acid soil, and it changes to pink in an alkaline soil.

6-8 inch, C. T., from 3" pot	1.00	7.00
Medium Clumps from field, B&B	.50	
Large clump from field, B&B	1.00	

IDESIA POLYCARPA

Desirable shade tree, growing to about 25 feet in height. Leaves are very large, heart shaped, with long red stems. It is attractive in its color contrast of green leaves with red stem. In the fall it turns yellow to red color. Very rapid grower.

2-3 feet, field grown, bare root	.25
3-4 feet, field grown, bare root	.40

LAGERSTROMIA INDICA (Crepe Myrtle)

One of the favorite flowering shrubs of the South. Hardy and heavy bloomer for a long period. It paints the landscape in summer with its brilliant blossoms in tones of many different shades, being called "Southern Lilac." Crimson, white, and lavender.

12-18 inch, field grown	1.25	10.00
18-24 inch, field grown	1.75	15.00
3-4 feet, field grown	2.00	17.50

LESPEDEZA FORMOSA (Purple Bushclover)

One of the most attractive herbaceous shrubs. It blooms twice a year (May and September) and bears a profusion of rosy purple, sweet-scented, pea-shaped flowers on arching branches. The tops freeze out in severe winter but come back each spring.

8-12 inch, C. T. -----	.75	5.00
2 Year, C. TT. -----	1.25	10.00

ORIENTAL MAGNOLIA

Although not known much in the South, Oriental Magnolia is most highly esteemed by Northern and Eastern gardeners. It is a most beautiful flower in early spring.

M. DENUDATA

Well known as Magnolia Conspicua. Large pure white flowers appear at early spring before its leaves come out.

18-24 inch, S. -----	2.50
2-3 feet, S. TT. -----	.50
3-4 feet, S. TT. -----	.75

M. DENUDATA HYBRID

Grows to tree 25 to 30 feet. Flower much larger than M. Soulangiana, 9 petals. Color ranges from white with pink to almost white. Leaves roundish and very large. One of the best Magnolias. (We have only small sizes in limited supply.)

2½" pot, C. -----	2.50	20.00
18-24 inch, field, B&B -----	1.50	

MAGNOLIA LILIFLORA

Flower of lily shape in dark purple at outside and creamy white at inside of petal. It blooms before leaves come, a little later than M. Soulangeana.

	Each	10	100
4-6 inch, C., from 2½" pot -----	1.25	10.00	
8-12 inch, C., from 3" pot -----	1.75	15.00	
18-24 inch, field grown, 3-4 cane, B&B -----	.75		
2-3 feet, field grown, B&B -----	1.25	--	

M. SOULANGEANA NIGRA

Very similar to M. Liliiflora, except the color, which is much darker on both sides, in and out.

4-6 inch, C., from 2½" pot -----	1.25	10.00
6-8 inch, C., from 3" pot -----	1.75	15.00
12-18 inch, field, B&B -----	.50	

M. SOULANGEANA

Chinese Saucer Magnolia. Flower white with rosy pink base of petals. It blooms in profusion before leaves appear. This is the most popular variety.

4-6 inch C., from 2½" pot -----	1.75	15.00
8-12 inch, C., from 3" pot -----	2.25	20.00
12-18 inch, field, B&B -----	.75	
18-24 inch, field, B&B -----	1.00	

M. SOULANGEANA, Darkest Purple

This new variety was established from some seedlings. The growth and habits resemble M. Soulangeana Nigra, but the flowers are larger and they have 9 petals instead of the 6 petals of Soulangeana Nigra. Color is much darker purple than Nigra. It is almost black.

	Each	10	100
2½" pot, C. -----	.35	2.50	
12-18 inch, G., bare root -----	.75		
18-24 inch, G., bare root -----	1.50		

M. STELLATA (Star Magnolia)

Rather dwarf growing. The flower is much smaller than the other Magnolias, but its dainty, delicate pinkish-white star-shaped flower is a favorite in the spring garden.

	Each	10	100
2½" pot, C. -----	.25	2.00	
12-18 inch, field grown, light, B&B -----	.50		
18-24 inch, field grown, light, B&B -----	1.00		

PRUNUS JAPONICA (Flowering Almond)

This is very rare for this country. Immense single pink flowers in spring, being followed by abundant fruit, shape and flavor of which are similar to commercial cherry, but smaller in size. Dwarf in nature. Planting Among evergreen shrubs will give the most desirable effects

6-8 inch, C. T. -----	.50	4.00
8-12 inch, C. T. -----	.75	6.00
2-3 feet, field, B&B -----	.40	
3-4 feet, field, bushy, B&B -----	.75	

JAPANESE FLOWERING CHERRY

Heretofore it was believed by many Southern gardeners that the Japanese Flowering Cherry tree could not be successfully grown down South. It is now, however, proved by us that they can be, if the varieties best acclimated are used. You may pay us a visit to see for yourselves thousands of them thriving wonderfully and blooming in our nursery grounds. We offer you this year the following two varieties.

PRUNUS YEDOENSIS (Somei-Yoshino)—One of the most popular varieties in Japan, being planted in parks, temple grounds, school yards, along the river banks, and highways in Tokyo. A rapid grower, with rather slender branches. Estimated height about 30 feet. The flower is rather small and 3 to 6 flowers in a corymb or cluster. Pinkish white in color, slightly fragrant. It blooms profusely before young leaves sprout.

PRUNUS LANNESEANA (Oshima Sakura)—Large flowering Japanese Cherry. There are hundreds of cultivated varieties in this group. Flower single or double, much larger in size than all other varieties. The tree is rather dwarf in nature. Compact with heavy stiff branches. We offer you this year a single flowering variety that was introduced to this country years ago by the Bureau of Plant Industry. The flower measures $\frac{1}{2}$ to $\frac{3}{4}$ inch in diameter and 3 to 6 flowers in a cluster. Color, white with pinkish tint, fragrant.

PRICES ON THE ABOVE TWO VARIETIES

	Each	10	100
3-4 feet, bare root -----	.50	4.00	
4-5 feet, bare root -----	.75	6.00	
8-12 feet, bare root, blooming size -----	2.00		

SPIREA REEVESIANA FLORA PLENA

Commonly known in the South as "Double Bridal Wreath" (though this may be wrong). Very handsome shrub with large pure white double flowers covering its slender arching branches. As it blooms just when Azaleas are in the height of their glory, it makes a splendid combination with them. This is the best variety for the South, though it may not stand very severe Northern climate.

12-18 inch, field grown -----	1.00	8.00
18-24 inch, field grown -----	1.50	12.50
2-3 feet, field grown -----	2.50	20.00
2-3 feet, field grown, very bushy, B&B -----	.50	
3-4 feet, field grown, very bushy, B&B -----	.75	

Flower and Leaves of
STEWARTIA PSEUDOCAMELLIA

STEWARTIA PSEUDOCAMELLIA

Sometimes called "Summer Camellia" or "False Camellia" in Japan. A shrub with upright branches or tree attaining 20 feet. Leaves 2 to 3 inches long, elliptic to elliptic lanceolate, acute at both ends, bright green. Flowers single, pure white with numerous yellow stamens, $2\frac{1}{2}$ to 3 inches in diameter. Bloom, July and August. Rapid grower and very hardy for both cold and hot climate.

	Each	10	100
6-8 inch, C. T. -----	.75	6.00	
8-12 inch, C. T. -----	1.00	8.00	
3-4 feet, field, B&B -----	1.00		

VINES AND CLIMBERS

BOUGAENVILLEA, CRIMSON LAKE

The best of Bougaenvillea. Very rich brilliant crimson-like color and more profuse bloomer than any other variety. Florists grow it in pots for holiday trade, while in Southern Florida and Southern California it is raised outside for climbing vine.

	Each	10	100
4-6 inch, C., from $2\frac{1}{2}$ " pot -----	.75	6.00	
6" pot, heavy bushy type -----	.50		

BOUGAENVILLEA SANDERIANA

(Lavender Flower)

2 $\frac{1}{2}$ " pot -----	.75	6.00
6" pot, heavy, bushy -----	.50	

EUONYMUS RADICANS (Winter Creeper)

A fine evergreen creeper with small shiny green foliage.		
6-8 inch, C. T. -----	.60	5.00
8-12 inch, C. T. -----	1.00	7.00
12-18 inch, field, clump, B&B -----	.25	

FICUS REPENS (Climbing Fig)

Though it is not very hardy, it is one of the best climbers, if not the best, known in the South, to cover stone or brick walls as well as rocks.

	Each	10	100
6-8 inch, from 2½" pot -----	.75		6.00

HEDERA HELIX

LARGE LEAVED ENGLISH IVY

8-12 inch, 2½" pot -----	.75	5.00

DWARF JAPANESE IVY

3-5 inch, from 2¼" pot -----	1.75	15.00
------------------------------	------	-------

MITCHELLA REPENS

(Commonly Called "Partridge Berry")

2½" pot -----	.75	5.00
---------------	-----	------

STAUNTONIA HEXAPHYLLA

A novelty from Japan. Commonly called "Evergreen Akebia." A woody climbing shrub. The leaves are like Akebia but pointed and much larger, and they are evergreen. The flower is small, pinkish white, and is produced from the axils of the leaves. Fruit is ovoid, two inches in size, ripening in the fall; it is edible and very sweet.

From 2½" pot -----	1.25	10.00
--------------------	------	-------

From 3" pot -----	1.75	15.00
-------------------	------	-------

THUNBERGIA GRANDIFLORA

A very showy, vigorous growing vine with large dark green foliage and dark blue tubular flowers. Rather tender.

6-8 inch, 2½" pot (sprin gdelivery) -----	1.00	8.00
---	------	------

TRACHELASPERUM JASMONIDES (Star Jasmine)

Finest vine to cover arbor, pagoda or screen. Leaves are roundish oval, thick shiny green. Star-shaped white flower, very fragrant. The view is grand when in full bloom. If properly trained, this is a better pot plant than English Ivy.

8-12 inch, C. TT. -----	.90	7.00
-------------------------	-----	------

TRACHELASPERUM JASMONIDES

(Yellow Flowering)

8-12 inch, C. TT. -----	.90	7.00
-------------------------	-----	------

WISTERIA MULTIJUGA (Purple Flowering)

WISTERIA CHINENSIS ALBA (White Flowering)

2 years old, grafted -----	.35
----------------------------	-----

WISTERIA MULTIJUGA ROSEA (Pink)

Very rare variety. Clear pink to light pink, raceme very long, reaching very often over two feet in length. The vine grows vigorously.

WISTERIA MULTIJUGA KYUSHAKU

Extra long cluster—over four feet—purplish blue color.

PRICES ON ABOVE WISTERIAS

2- year, grafted -----	.50
------------------------	-----

WISTERIA RETICULATA (Milletia Japonica)

Deep purple flower in mid-summer. Leaves and vine are rather coarser than ordinary wisteria.

6-8 inch, from 2½" pot -----	1.25	10.00
------------------------------	------	-------

PALMS, GRASSES and MISCELLANEOUS

LILUM PHILLIPPINO FORMOSA

This is one of the recent creations and is most rapidly attaining popularity. The flower much resembles the Easter Lily. It is large, trumpet-shaped; color, pure white with exception of occasionally appearance of reddish brown narrow stripe on outside of petals. The stems generally grow to 3 or 4 feet in length, but sometimes they reach 7 to 8 feet. The leaves are dark green, narrower but much longer than Easter Lilies. It blooms outside under natural conditions from July to September. It blooms as early as six to seven months after sowing the seed, if kept in a place where the temperature of 60 degrees or higher is maintained continuously. It is, however, more practical and profitable to use small two-year-old bulblets that will be sure to produce excellent flowers in the same season. We have been experimenting with many varieties of lilies for the past several years, but have found no other lily or lilies so easy to grow and which bloom so early as this Phillipino lily does.

The excellent points of this wonderful lily may be summarized as follows:

1. **Flower:** its shape, color, and so forth, are highest quality from commercial standpoint.
2. **Blooms** in late summer, after the Easter Lily and regal lily have disappeared, and when no lily of this type is in the market.
3. **Its easy cultivation**, especially for outdoor planting.
4. It is of a very early blooming nature, from the seed as well as from small bulblets. No other variety of lily is known to parallel this Phillipino Formosana lily.

We urge all florists—large or small—to try this wonderful new lily for money making.

Seed, improved type: oz., \$1.00; $\frac{1}{4}$ lb., \$3.00; 1 lb., \$10.00

PRICE ON BULBS, IMPROVED TYPE
